Removes all elements from `array` that
`predicate` returns truthy for * and returns

an array of the removed elements. The predicate is bound to `* `thisArg`` and invoked with three arguments: (value, index, array). `**` If a property name is provided for ``predicate`` the created ``_.property`` `*` style callback returns the property value of the given element. `**` If a value is also provided for ``thisArg`` the created ``_.matchesProperty`` `*` style callback returns ``true`` for elements that have a matching property `*` value, else ``false``. `**` If an object is provided for ``predicate`` the created ``_.matches`` `*` style callback returns ``true`` for elements that have the properties of the given `*` object, else ``false``. `**` **Note:** `**` Unlike ``_.filter``, this method mutates ``array``. `**`
