As a result, most systems are set to have a 1 MB limit on the maximum size of a block (20 MB in Bitcoin Classic, 100 MB in Bitcoin Unlimited). But this 1 MB block size limit could become a major stumbling block for future scaling proposals, a conundrum that may threaten Bitcoin's ability to survive on its own. It's A Flap In a new research note posted to the website on July 30, the Fundstrat Global Advisors, a prominent Bitcoin price and investor-focused firm, argued that the 1 MB block size limit may need to be revised in order for Bitcoin to survive on its own.
