
Wilcom 2006 Sp4 R2 Windows 7 X64 47

[Download](#)

A: According to your screenshot, you are actually looking for a copy of Windows 7 SP1. As far as I know, SP1 does not include the "New Shell" feature. Which is what is likely giving you that.txt file that you are extracting from. If you are wanting a newer

version of Windows 7 with all the newer features, you might want to consider an upgrade to Windows 8.1 instead of Windows 10. But that is just my opinion. Q: .htaccess redirect from www to no-www and back i want to redirect this to this is there a way to do this

in.htaccess? Thanks for any help! A: You can do it like this in your root.htaccess:

```
RewriteEngine on # /web/public/index.php?option=com_hr_employee&task=add_employee&id=1 RewriteCond  
%{THE_REQUEST} /web/public/index\.php\?option=com_
```

```
hr_employee&task=add_employ
ee&id=1 [NC] RewriteRule
^ /web/public/index.php?optio
n=com_hr_employee&task=ad
d_employee&id=1 [R=301,L]
RewriteCond %{REQUEST_F
ILENAME}!-f RewriteCond
%{REQUEST_FILENAME}!
-d RewriteCond
```

`%{REQUEST_URI}`
`^/web/public/(index\.php)?$`
`RewriteRule (.*) index.php?option=com_hr_employee&task=add_employee&id=1 [L] A:`
Try adding a redirect on the server itself: `Redirect 301 /web/public/index.php?option=com_hr_employee&task=add_e`

mployee&id=1
