Congratulations to the Winning Research Groups This Year!! December 3, 2013
Congratulations to the Winning Research Groups This Year!! We would like to thank all the research groups that participated in the 2013 Research Grants competition, and congratulate the winners and runners-up. We will be visiting these groups to build research collaborations, so please keep an eye on your emails for dates and times of visits. The National Museum of the Royal Navy Research Student Award is aimed at students who are on a course that has as part of its core requirement a research project in marine conservation or related subjects. Recipients School: University of Plymouth Department: Biology Graduate: Julian Hawthorne Julian Hawthorne, a UoP PhD student in the department of Zoology, says "The PhD is a great vehicle for someone interested in biology but there are lots of other options. I chose marine biology because I love the ocean and I have always been interested in the psychological sciences. My project is looking at how the marine environment is influenced by rising levels of carbon dioxide. I'm particularly interested in what this means for jellyfish, marine life and the wider marine environment." Winner The Skoll Award is designed to identify and support people with the skills and passion to make a major impact
