Youtube To Android is a very simple-to-use software program designed to download YouTube clips and prepare them for playback on Android devices by turning them into MP4-formatted files. It does not come packed with complex options or configuration settings, making the tool accessible to all types of users, even the ones with little or no experience in video converters. Ad-supported program The

---

installation procedure takes little time to finish. However, you should be careful when going through the wizard steps, since Youtube To Android offers to download and install third-party components that it doesn't actually need to work properly. They can be removed from installation, though. Straightforward interface and options The primary panel is small and includes just a few buttons. All you have to do is paste a YouTube link in the dedicated box, specify the output

---

file name and directory, and start the downloading and automatic conversion operation. On task completion it is possible to open the output folder without leaving the interface. Configure program settings seamlessly As far as app configuration is concerned, it is possible to specify the YouTube login credentials if required, as well as to edit proxy settings.

There are no other noteworthy options provided by this piece of software. Evaluation and conclusion The tool has minimal

---

impact on computer performance, since it runs on low CPU and RAM. It finishes download and conversion jobs rapidly and delivers quality clips. However, it failed in its attempt to download many links during our evaluation, popping up errors. We must also take into account that it has not been updated for a while. Thanks to its intuitive GUI and options, Youtube To Android can be used by anyone with ease. ... request autoscroll plugin that can be used with jquery mobile framework
