MSI Afterburner 3.0.0.0 for Windows. The loading screen is black , and that's it. The intro screen stays black until the program window shows up. So it's a bit of a waste of time to run it. My speed and fps is good. Multi-threaded and vc++ compiler are not working. MSI Afterburner 3.0.0.0 Serial key: Reg. I have 9600 GT. You do not understand what I'm asking. I need to see if the PC is 512 mb or not. Some time ago, I had a problem that I received an message from an icon in the desktop. However the Internet is black and gray and the mIRC did not work. After a while I restarted my PC and I can not open any windows. When I remove the diskette the Windows Loader always crashes. Disable Windows Startup sounds I know that some of the startup sounds in Windows can be disabled by opening a command window and typing "sfc /scannow" (once in Windows Recovery and then again. Replaces "Add / Remove Programs." The startup sounds are disabled - Hope this helps. [I would have put the sound format on the cmd line, but it isn't showing anything - and no sound - Im all ears. You can go to Start, then Settings, then Control Panel, then Sound, then sounds. See if that turns anything on or off. I just updated my BIOS to Version 08.05 and when I reboot, my screen is all scrambled. I don't know how to use the bios to clear it to default, as I have to use that screen to make my modem work. I also have 512 mb of ram. I have Windows XP Home SP2 installed. Any help would be appreciated. Thanks Sol I am reading one of your replies that this is a Windows XP Operating System. I installed this same driver on my Windows Vista Operating System, and it worked fine. I don't know much about Windows, but this is my advice. Maybe you have already downloaded and installed my driver.Langacher College Langacher College was an educational institution for women in Chicago founded in 1892 by Elizabeth Langacher. Its program of study included subjects such as public health, education, and sociology. It merged with the University of Chicago in 1918.
