What's New In?

Glimmer allows you to easily create interactive elements on your web pages by harnessing the power of the jQuery library. Without having to hand-craft your

JavaScript code, you can use Glimmer's wizards to generate jQuery scripts for common interactive scenarios. Glimmer also has an advanced mode, providing a design surface for creating jQuery effects based on your existing HTML and CSS. With Glimmer, easily create interactive experiences like rotating photo-galleries / mastheads, drop-down navigation, hover effects, or custom animations. Glimmer lets you create elements like DIVs, Links, or Tables with ease Glimmer lets you add extra properties to elements like border-radius or box-shadow Glimmer allows you to move common interactives to their own HTML area. Simply move some elements outside of your original DIV, and they'll move into a new area instead. When using Glimmer, you can write an easy and generic markup. No need to craft any code for every different type of element. You don't have to use any javascript syntax. Instead, you can write common elements like "a" or "input". After adding the element to your page, Glimmer will populate the element with additional attributes or data. For instance, after adding a "input" element to your page, you'll notice that the element has a "name" attribute automatically added to it. Glimmer allows you to quickly add interactive elements to your pages and

customize them afterwards Glimmer allows you to use your existing HTML to create interactive elements. This saves you time and allows you to focus on adding the interaction to the elements instead. In Glimmer, you'll find interactive elements that can help you create a great interactive experience, without having to code it yourself. All you have to do is create an element (like "a" or "input"), add the attributes you want and Glimmer will generate the code for you. So whether you need a dropdown menu, a basic button, an eye catching gallery, or a list of products, Glimmer is the tool to help you build them. Create a new project in Glimmer. You can use the "Create &run" feature to quickly create your elements and run them. A new Glimmer project includes basic sample HTML and CSS. If you want to use your own HTML / CSS, no problem! Glim

System Requirements For Glimmer:

PC: Windows 7 or higher. Intel Core 2 Duo 2.5 GHz
