(Error code: -2147012583) Description: ReportGui is a friendly and reliable utility designed to help you create and edit your databases. It is more than just a tool, but also an easy to use and user-friendly interface that allows you to generate and edit database reports. The program allows you to work with multiple database formats including dBase (DBF), Paradox (DB), TXT, CSV, Oracle, Interbase, MS Access, MS Excel, SQL Server, HTML, Visual FoxPro, MySQL and PostgreSQL. By using Windows file system as a database, and considering that folders are tables and files are table items, you can print lists of files from a specified folder. Additionally, you can create reports using your files and folders, as the application can build and print them. Apart from this, you can also edit the database queries written in SQL, as the program provides you with advanced code editing functions, such as code completion and syntax highlighting. A dependable and easy to use database report generator. To conclude, ReportGui allows you to generate elaborate reports about the information contained on your databases, whilst giving you the tools necessary to edit any of the data contained by a report. 1-ReportGui.exe ReportGui.exe - Error: The specified procedure could not be found.
